1. Product introduction

This data booklet comprises an overview of the Grundfos vortex flow sensor range and related products.

Fig. 1 Grundfos vortex flow sensors

The Grundfos vortex flow sensor range comprises flow measurement systems as well as combined flow and temperature measurement systems (two-in-one) designed for harsh aqueous environments.

Vortex principle

The flow measurement is based on the vortex principle. The system elements include a flow pipe with an integrated bluff body and a differential pressure sensor.

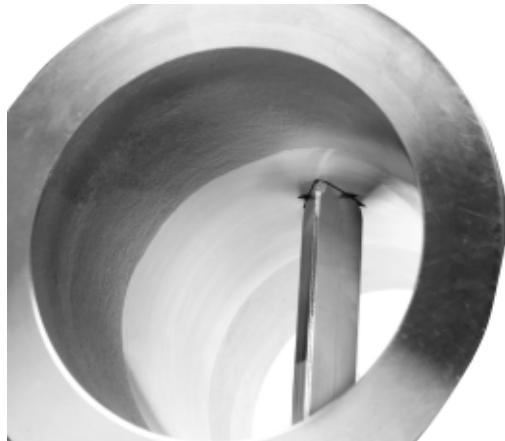

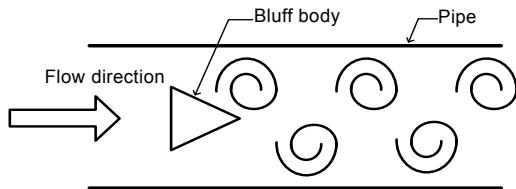

Fig. 2 Bluff body inside a vortex flow sensor

TM04 7362 1610 - TM05 4739 2412 - TM05 4746 2412

When a bluff body is placed inside a pipe, a series of vortices will be generated on either side of the bluff body. These vortices propagate downstream, giving rise to periodic pressure variations which can be detected by the pressure sensor. The frequency of the pressure variations is proportional to the volume flow through the pipe.

TM04 7155 1610

Fig. 3 Operating principle

The bluff body is designed to optimise the pulse strength of the pressure variations at the position of the differential pressure sensor.

Flow ranges are determined by the pipe diameter and the signal processing parameters. The differential pressure sensor key elements are a bulk micromachined silicon chip and a microprocessor-based signal-conditioning circuit, both on the same PCB. The conditioning circuit converts the pressure reading to a signal proportional to the flow.

Construction

The bluff body is either integrated in the injection moulded flow pipe, or supplied as a separate composite or stainless steel part to be inserted in the flow pipe.

The chip has a square membrane, which wraps due to pressure difference. This is registered as a change of resistance in the strain gauges of a Wheatstone bridge. The pressure and temperature sensitive area (the membrane region) is coated on both sides by an extremely corrosion and diffusion resistive thin film (Silicoat®). The coating provides direct environmental robustness of the chip. The media-free zone is sealed by an O-ring.

Material

The Grundfos vortex flow sensors are available in two material variants, suitable for different media:

- EPDM: suitable for water (drinking-water approved).
- FKM: suitable for oily media and for water in heating applications.

Type Key

This type key is common to all Grundfos Direct Sensors™ and thus not only specific to flow sensors.

2. Vortex flow sensor, industry (VFI)

VFI general data

Fig. 4 VFI sensor

TM04 7362 2210

Technical overview

The VFI sensor from Grundfos Direct Sensors™ is a flow sensor designed for industrial purposes. It is based on the principle of vortex shedding behind a bluff body. The VFI sensors are fully compatible with wet, aggressive media. They use MEMS sensing technology in combination with the Silicoat® corrosion-resistant coating technology on the sensor chip.

This makes the VFI sensors very robust and ideal for pump integration and monitoring in harsh environments.

The sensor is supplied with a stainless steel flow pipe and has flanges or threaded ends for use with union nuts.

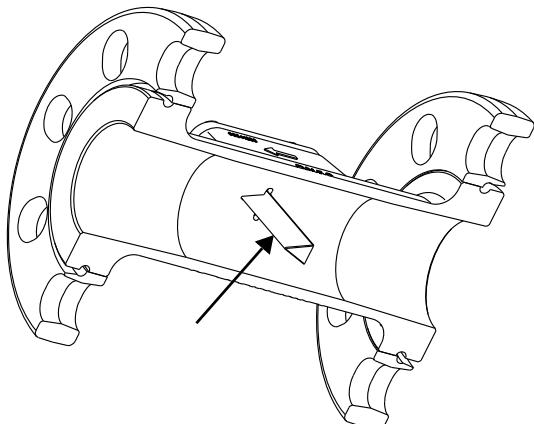

Fig. 5 Bluff body in a VFI sensor

TM04 9228 3710

Applications

- Water treatment and distribution
- water utility
- water monitoring
- HVAC systems
- chiller systems
- HPC and IT cooling systems
- micro CHP
- heat pumps
- solar systems: heating and cooling.

Features

- Wide operating temperature range: -30 - 120 °C (-22 to 248 °F)
- compact design
- MEMS technology.

	m³/h	gpm
Flow ranges	0.3 - 6	1.32 - 26.42
	0.6 - 12	2.64 - 52.83
	1.3 - 25	5.72 - 110.07
	2-40	8.81 - 176.11
	3.2 - 64	14.09 - 281.78
	5.2 - 104	22.89 - 457.89
	8-160	35.22 - 704.46
	12-240	52.83 - 1056.69

Benefits

- No moving parts
- compatible with wet, aggressive media
- accurate, linearised and temperature-compensated output signal
- quick temperature response (direct contact with medium)
- cost-effective and robust design
- system solution with Grundfos pumps.

Approvals

- WRAS
- KTW
- ACS.

3. Vortex flow sensor, standard (VFS)

VFS general data

TM05 4745 2412

Fig. 31 VFS and VFS QT Sensors

Technical overview

The VFS sensor from Grundfos Direct Sensors™ is a combined flow and temperature sensor (two-in-one solution). It is based on the principle of vortex shedding behind a bluff body.

The VFS sensors are fully compatible with wet, aggressive media. They use MEMS sensing technology in combination with the Silicoat® corrosion-resistant coating technology on the sensor chip.

The sensor is supplied with a flow pipe.

Applications

- Water treatment and distribution
- water utility
- water monitoring
- HVAC systems
- chiller systems
- HPC and IT cooling systems
- micro CHP
- heat pumps
- solar systems: heating and cooling.

Features

- Wide temperature measuring range: 0-100 °C (32-212 °F)
- compact design
- MEMS technology.

	I/min	gpm
Flow ranges	1-12	0.26 - 3.17
	1-15	0.26 - 3.96
	1.3 - 20	0.34 - 5.28
	2-40	0.53 - 10.57
	5-100	1.32 - 26.42
	10-200	2.64 - 52.83
	20-400	5.28 - 105.67

Benefits

- Flow and temperature measurement in one sensor (two-in-one solution)
- no moving parts
- compatible with wet, aggressive media
- accurate, linearised and temperature-compensated output signal
- quick temperature response (direct contact with medium)
- cost-effective and robust design
- system solution with Grundfos pumps.

Approvals

- WRAS
- KTW
- ACS.

Electrical connections

TM04 7156 1610

Fig. 32 Electrical connections

Pin configuration	Colour
1 Temperature signal (0.5 to 3.5 V relative to pin 3)	Yellow
2 Flow signal (0.5 to 3.5 V relative to pin 3)	White
3 GND (0 V), PELV	Green
4 Power supply (+ 5 VDC)	Brown

Power supply requirements

5 VDC ± 5 %, PELV

- separated from hazardous live circuitry by double or reinforced insulation
- we recommend separate ground for the sensor power supply.

VFS sensors

TM05 4744 2512

Fig. 33 VFS family

The VFS flow sensor consists of a composite flow pipe and a sensor fitted with cable.

The VFS flow sensor is available in 1-20, 2-40, 5-100, 10-200, 20-400 l/min versions.

VFS QT sensors

TM05 4743 2512

Fig. 34 VFS QT family

The VFS QT flow sensor consists of a composite insert, a stainless steel flow pipe and a sensor fitted with cable.

The VFS QT flow sensor is available in 1-12, 1-15, 2-40, 5-100, 10-200 l/min versions.

Specifications

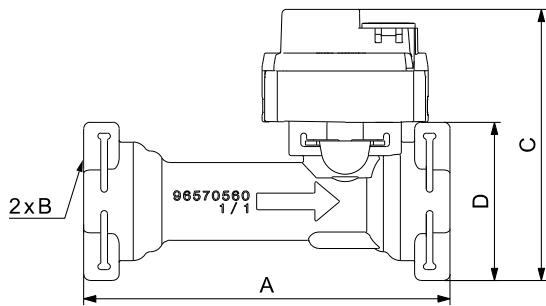

Flow

Measuring range	10-200 l/min (2.6 to 52.8 gpm)
Accuracy ($\pm 1\sigma$), 0-100 °C (32-212 °F)	$\pm 1.5\% \text{ FS}$
Response time (63.2 %)	< 1 s
Resolution	1.0 l/min (0.26 gpm)

Temperature

Measuring range	0-100 °C (32-212 °F)
Accuracy ($\pm 1\sigma$), 25-80 °C (77-176 °F)	$\pm 1\text{ K}$
Accuracy ($\pm 1\sigma$), 0-100 °C (32-212 °F)	$\pm 2\text{ K}$
Response time (63.2 %)	250 ms
Resolution	0.35 K

Media and environment

Medium types	Kinematic viscosity $\leq 2 \text{ mm}^2/\text{s}$ (cSt)
Medium temperature (operation)	Water: 0-100 °C (32-212 °F)
Medium temperature (peak)	-25 °C (-13 °F), non-freezing 120 °C (-248 °F) for 5 minutes, up to 3 weeks in sensor lifetime
Ambient air temperature (operation)	-25 - 60 °C (-13 - 140 °F)
Ambient air temperature (peak)	-55 - 90 °C (-67 to 194 °F)
Humidity	0-95 % (relative), non-condensing
System burst pressure	> 16 bar (232 psi)

Electrical data

Power supply	5 VDC ($\pm 5\%$). We recommend grounding of the sensor supply (PELV)
--------------	---

Output signals	Ratiometric
Flow signal	0.5 - 3.5 V (Zero at 0.35 V)
Temperature signal	0.5 - 3.5 V
Power consumption	< 50 mW
Load impedance	> 10 kΩ
Maximum cable length	3 m (9.10 ft)

Materials

Sensing element	Silicon-based MEMS sensor
Seal (sensor to housing)	EPDM
Housing	Composites (PPS, PA66)
Flow pipe	PPA 40-GF
Wetted materials	Corrosion-resistant coating, EPDM or FKM, PPS, PPA 40-GF

Environmental standards

Enclosure class	IP44 (cable connected)
Temperature cycling	IEC 68-2-14
Vibration (non-destructive)	20-2000 Hz, 10G, 4 h
Electromagnetic compatibility	EN 61326-1

4. Product range

VFI sensor

Scope of delivery:

- Flow pipe with sensor
- flanges (only for flange versions)
- fittings and union nuts (for threaded versions)
- 5 m (16.4 ft) cable with free cable end
- quick guide.

VFS sensor

Sensor selection

Grundfos offers a wide range of custom-built VFS sensors.

The VFS sensors can be customized depending on the application. The tables below list all the variants. Be aware that not all combinations are possible. Therefore, please contact Grundfos Direct Sensors when proceeding to selection.

Example of a type key:

VFS / 20-400 L / 1 / D / C 1.200 E / G4 / CS / 25P / W-1

1	2	3	4	5	6	7	8	9	10
VFS	20-400	L	1	D	C1.200E	G4	CS	25	P

1. Product group

2. Product range and units

Product range	Range of unit
20-400	L: litres/min.

3. Generation

Code	Generation
1	1st generation
2	2nd generation
3	3rd generation

4. Electrical output type

Code	Output
B	0-10 V
C	4-20 mA, 2 wires
D	0.5 - 3.5 V
E	0.5 - 4.5 V
F	2 x 0-10 V
G	4-20 mA, 3 wires

5. Cable and connectors:

- Middle letters: 1.200 is cable length in m
- First and last letters: Cable connector

Code	Cable connector description
B	FCI 90312-004LF/77138-101
C	CKM 42010107/42010311, tin plated
D	AMP 103648-3/104479-9
E	Molex 51004-0400/50011-8000
F	AMP 172167-1/0-170365-1
G	Tyco Val-U-Lok 794954-4/794958-2, gold plated
J	JST XHP-4/SXH-001T-P0.6
L	Lumberg 3510-04 K02
N	Lumberg 3510-04 K03
P	Molex 43025-0400/43030-0005, 43030-001/ Cembre 1910M16
Q	Molex 43025-0400/43030-0006
R	Molex 51004-0400/50011-8000/ Cembre 1900M12
X	Open ended

6. O-ring material and enclosure class

Code	Sealing description
E	EPDM (drinking water approved)
F	FKM (for use in oily media)
G	Gel-filled

Code Enclosure class

4	IP44
5	IP55
6	IP67

7. Material

- the first letter represents the flow pipe
- the second represents the mechanical connection

Code Material description

B	Brass
C	Composite
G	Cast iron
Q	Stainless steel flow pipe with composite insert (QT)
S	Stainless steel

8. Dimension of mechanical connection

Code	Dimension	Code	Dimension
03	G 1/2"	13	G4"
04	G 3/4"	17	7/16"
05	G1"	19	18.75 mm
06	6 mm	21	21.5 mm
07	G 1 1/4"	24	1/8 - 27
08	8 mm	25	3/4 - 14
09	G 1 1/2"	26	1 - 11.5
10	G 1 1/2"	27	1 1/4 - 11.5
11	G 2 1/2"	51	f1" - G 3/4
12	G 3"	52	f1 1/4" - G 1

9. Mechanical connection type

Code	Description
B	BSPT (ISO 7/1)
C	Compression
F	Flange
G	Flange and BSPP (ISO 228/1)
K	Clips
M	NPSM
N	NPT
P	BSPP (ISO 228/1)
S	Sweat
T	Tube
U	UNF

10. Packaging

Code	Description of packaging
A	Set with pre-assembled components
C	Cardboard box
D	Blister pack and cardboard box, standard Grundfos
P	Spare parts set
S	Set
V	Service set
W	Blister pack, standard Grundfos cardboard
N	Blister pack, neutral white cardboard
1	1 piece
10	Bulk 10
25	Bulk 25
50	Bulk 50
1H	Bulk 100
5H	Bulk 500

5. Accessories

Sensor interface - converter unit

The sensor interface, type SI 010 CNV, from Grundfos Direct Sensors™ is an external power supply, signal amplifier and signal converter for Grundfos sensors, standard variants (VFS, RPS, DPS).

SI 010 CNV has built-in precision resistors enabling the transmitter to give 4-20 mA, 1-5 V and 2-10 V output signals.

SI 010 CNV should be used in applications where sensors from the standard product range are used, but the controller requires a 4-20 mA input signal.

TM04-4882-2209

Fig. 76 Sensor interface, SI 010 CNV

Specification:

- Voltage range: 115-230 VAC \pm 10 % or 24 VDC
- frequency: 50-60 Hz
- power consumption: Max. 2.5 W
- ambient temperature: -20 - 50 °C (-4 to 122 °F)
- enclosure class: IP20.

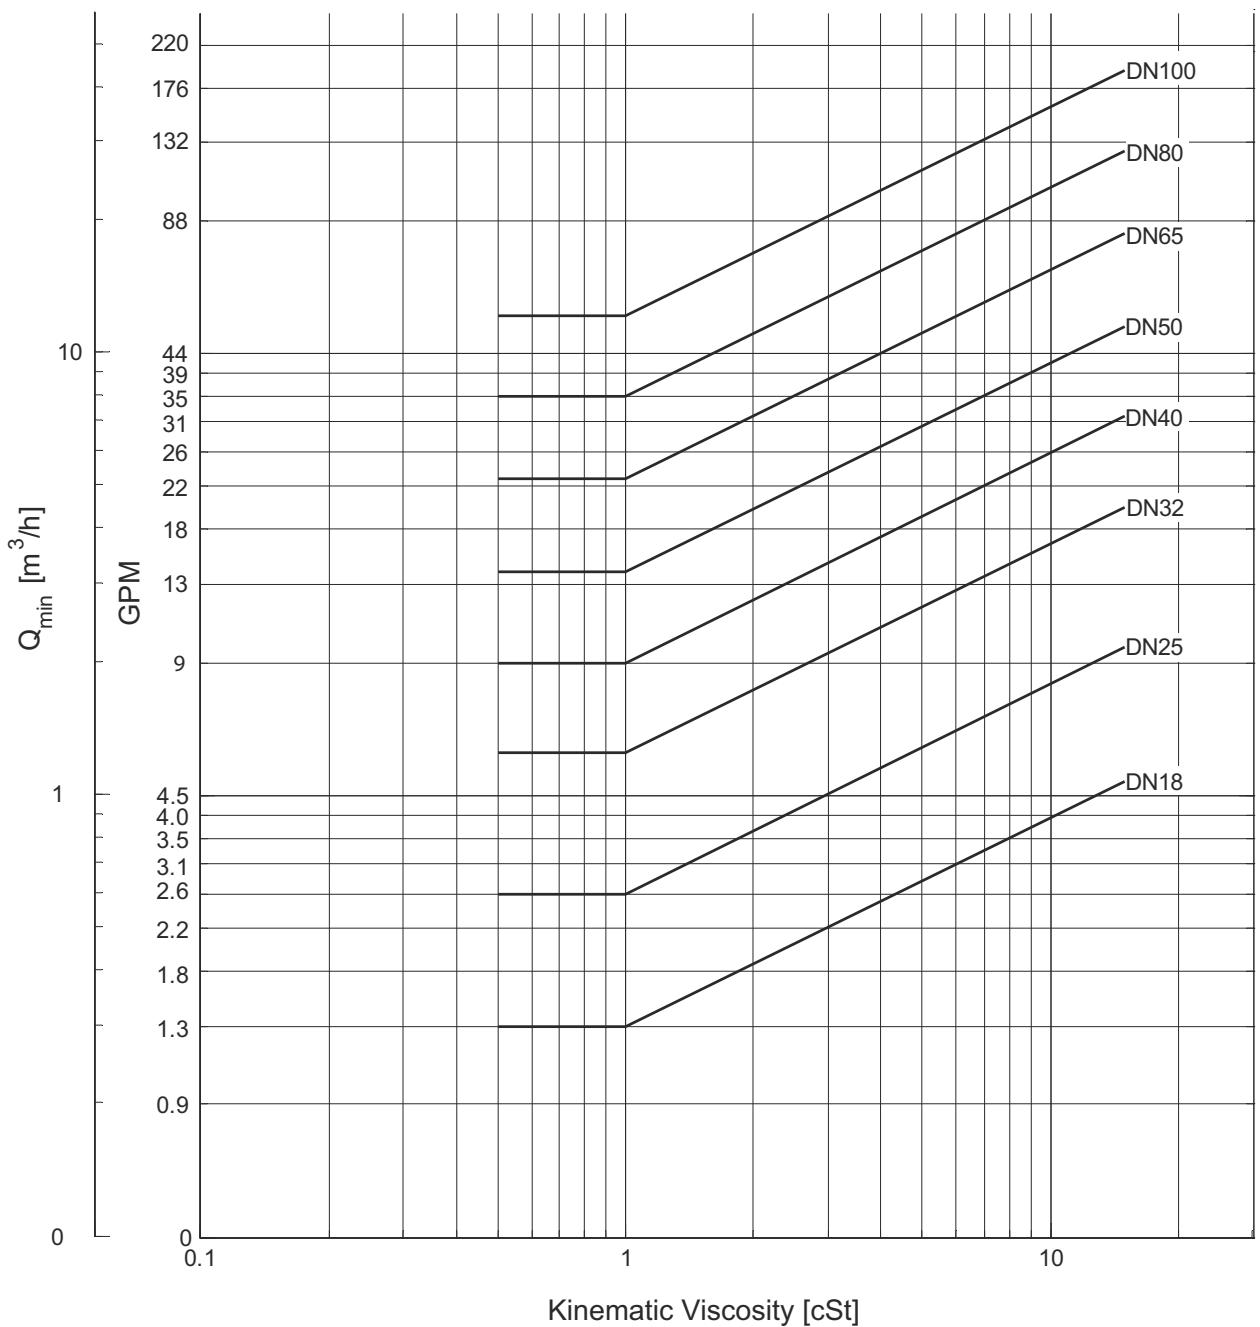

Part	Product Number
Sensor interface, SI 010 CNV, IP20	96983684

6. Appendix

Minimum flow rate curves

Minimum flow rate as a function of the kinematic viscosity

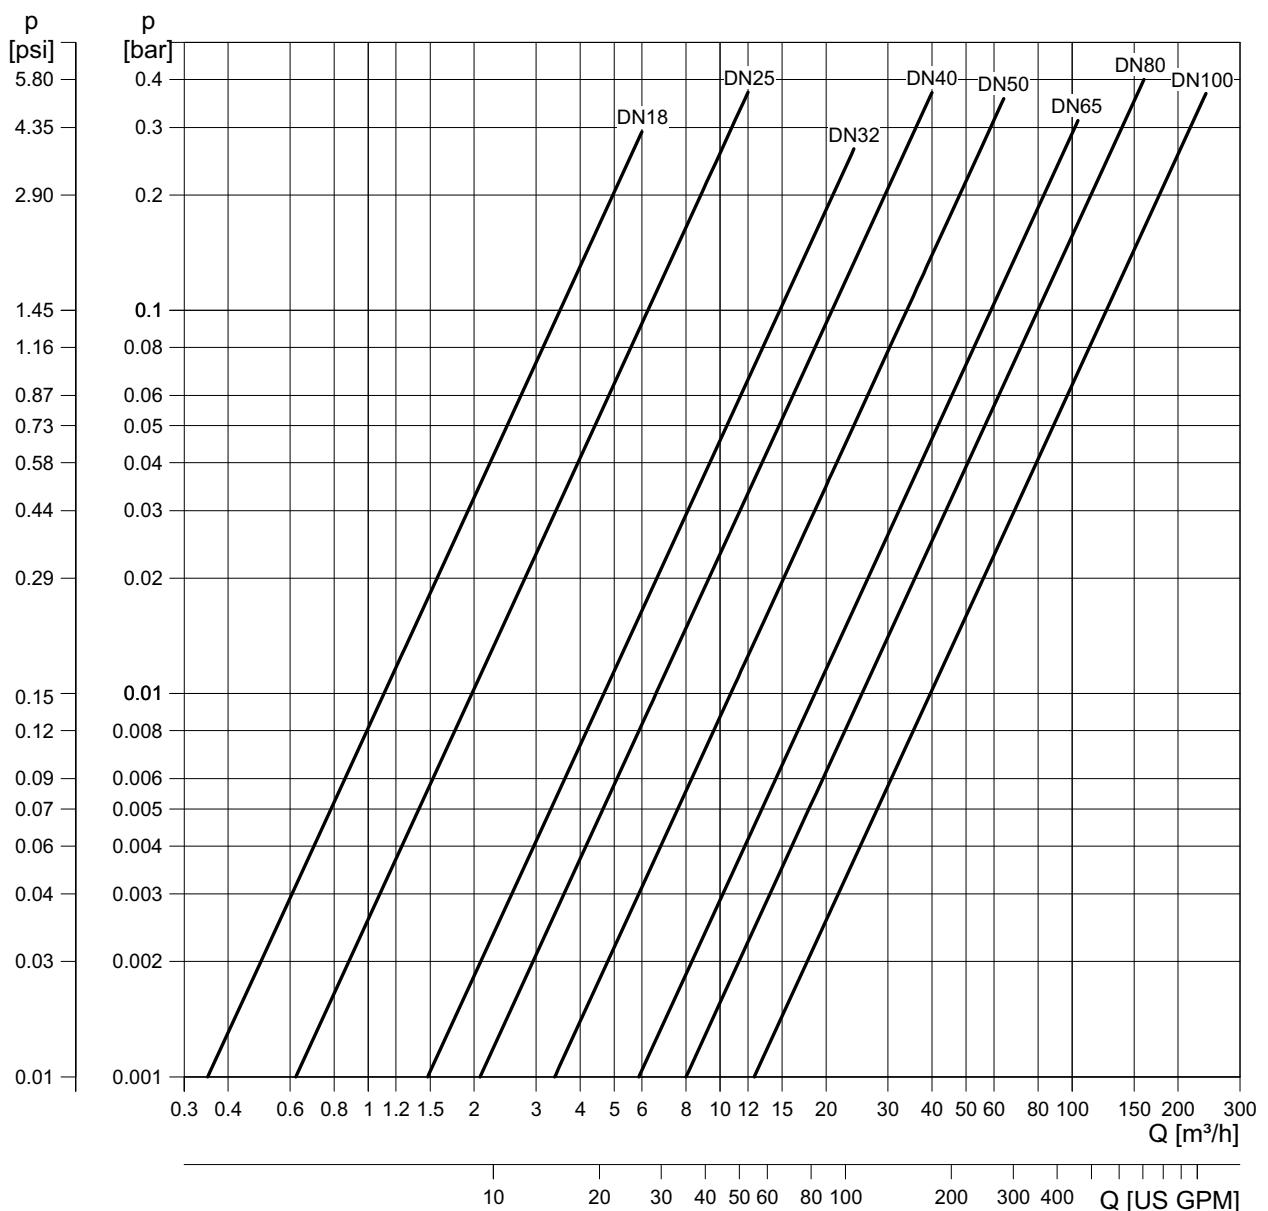

The minimum detectable flow rate (Q_{\min}) for the VFI sensors depends on the kinematic viscosity of the medium. The chart below shows Q_{\min} as a function of the kinematic viscosity.

- * Reference condition:
- Media at 20 °C (68 °F), 1013 mbar (1 atmosphere), $\rho = 998 \text{ kg/m}^3$ (62.3 lb/ft^3), $v = 1 \times 10^{-6} \text{ m}^2/\text{s}$ (1 cSt).

7. Grundfos Product Center

Online search and sizing tool to help you make the right choice.

<http://product-selection.grundfos.com>

SIZING enables you to size a pump based on entered data and selection choices.

REPLACEMENT enables you to find a replacement product. Search results will include information on

- the lowest purchase price
- the lowest energy consumption
- the lowest total life cycle cost.

The screenshot shows the main interface of the Grundfos Product Center. At the top, there's a navigation bar with links for HOME, FIND PRODUCT, COMPARE, YOUR PROJECTS, SAVED ITEMS, HELP, and a login section. Below the navigation is a search bar with placeholder text "Input product number or a whole or partial product name". To the right of the search bar is a "SEARCH" button. The main content area is titled "FIND PRODUCTS AND SOLUTIONS". It features four large buttons: "SIZING" (with subtext "Enter pump sizing"), "CATALOGUE" (with subtext "Products and services"), "REPLACEMENT" (with subtext "Replace an old pump with a new"), and "LIQUIDS" (with subtext "Find pump by liquid"). Below these buttons, there are sections for "QUICK SIZING" (with fields for "Flow (Q)*" and "Head (H)*") and "ADVANCED SIZING" (with options for "Advanced sizing by application" and "Guided selection"). To the right of the sizing section is a "Select what to size by:" dropdown menu with three options: "Size by application", "Size by pump design", and "Size by pump family". A "START SIZING" button is located at the bottom right of this section. At the bottom left, there's a note about the CATALOGUE feature, and at the bottom right, there's a note about the LIQUIDS feature.

All the information you need in one place

Performance curves, technical specifications, pictures, dimensional drawings, motor curves, wiring diagrams, spare parts, service kits, 3D drawings, documents, system parts. The Product Center displays any recent and saved items - including complete projects - right on the main page.

Downloads

On the product pages, you can download installation and operating instructions, data booklets, service instructions, etc. in PDF format.

Subject to alterations.
