

S-5!®

The Right Way!

CorruBracket

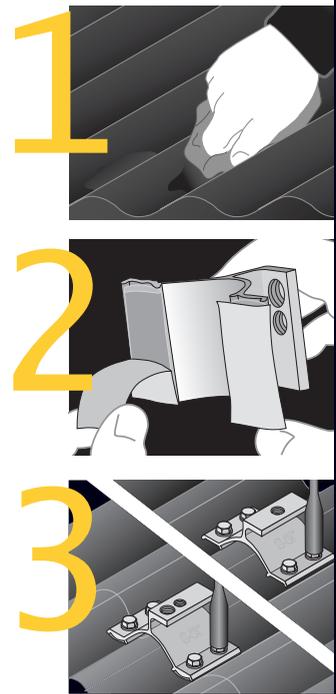

CorruBracket AU

CorruBracket™ and CorruBracket AU™

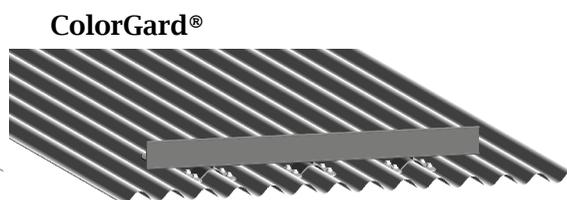

CorruBracket™ can be used to mount almost anything to corrugated metal roofing and is compatible with 7/8" and 3/4" corrugated roofing, while the CorruBracket AU™ is designed specifically for the Australian market and is compatible with 16-18mm corrugated roofing profiles. Each comes with factory-applied butyl sealant already in the base, and the S-5!® patented reservoir conceals the sealant from UV exposure, preventing drying and cracks.

Installation is simple! CorruBracket and CorruBracket AU are mounted directly into the supporting structure of the roof, i.e. roof decking, wood or steel purlins or trusses. No surface preparation is necessary; simply wipe away excess oils and debris, peel the release paper, align and apply. Secure through the pre-punched holes using the appropriate screws for the supporting structure. No messy sealants to apply! No chance for leaks!

You asked for it!
We've got it! Now
attach S-5-PV Kit and
PV modules, through
DirectAttached™ or
Rail methods, along
with many more
roof accessories to
corrugated roofing
with the S-5!
CorruBracket and
CorruBracket AU.

Strong enough for heavy-duty applications, the CorruBracket and CorruBracket AU are the perfect match for S-5!'s ColorGard® snow retention system, and their easy installation make them the best solution for installing photovoltaic solar arrays to corrugated roofing with the S-5-PV Kit.

CORRUBRACKET™ AND CORRUBRACKET AU™

Attach almost anything to corrugated metal roofing, with no messy sealants and no chance for leaks!

S-5!®

The Right Way!

CorruBracket™

CorruBracket AU™

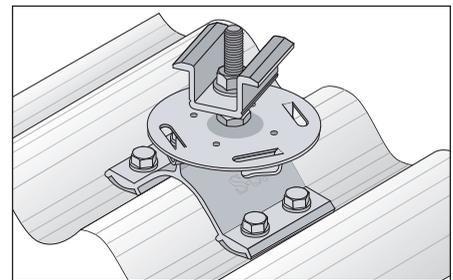

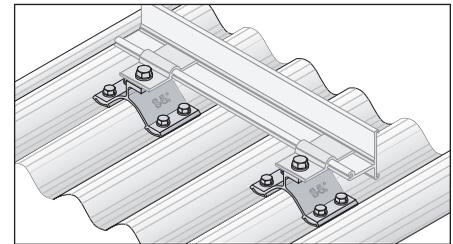

Each CorruBracket and CorruBracket AU comes with factory-applied butyl sealant in the base. CorruBracket and CorruBracket AU are compatible with most common metal roofing materials. For design assistance, ask your distributor, or use our web-based calculator at www.S-5.com for job-specific system engineering and design of your next snow retention project. Also, please visit our website for more information including CAD details, metallurgical compatibilities and specifications.

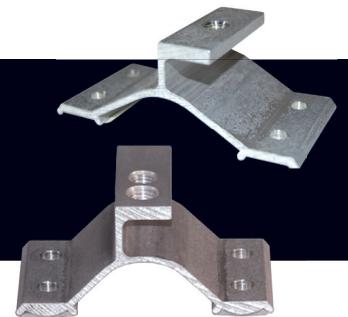

The CorruBracket and CorruBracket AU have been tested for load-to-failure results on wood decking, metal and wood purlins. The independent lab test data found at www.S-5.com can be used for load-critical designs and applications. S-5! holding strength is unmatched in the industry.

Contact your distributor for information on hardware needs.

Example Use

CorruBracket and CorruBracket AU are extremely versatile. No messy sealants to apply. The factory-applied butyl sealant waterproofs and makes installation a snap!
